

INCLUSIVE PLAY POLYDEK SURFACE

Used in Revolve, Fusion and Moonwalker

PolyDek is a strong recycled polyethylene board, laminated with a 3mm layer of thermoplastic rubber. The recycled polyethylene board ensures the required stiffness whilst the rubber layer enhances the product with excellent slip-resistant properties. The board is 18mm thick.

Environmentally friendly and easy to clean, PolyDek is unaffected by moisture and due to its excellent wear and chemical resistant properties, requires little or no maintenance. Using a smooth finish, PolyDek is ideal for a variety of applications including walkways, steps, ramps, climbing walls, decks and floor coverings.

Features

- Recycled HDPE base board
- Durable and strong
- Resistant to chemicals
- Low maintenance
- Environmentally friendly Wear resistant
- Excellent slip resistant top surface

Applications

- Decking
- Playground platforms and climbing walls
- Walkways and ramps
- Anywhere a skid-resistant surface is required

Standard Option

18mm thick, smooth blue polydek used on rim of Revolve and Fusion and to top of Moonwalker for durability and safety.
